

DO NOT TOUCH my XM SATILITE RADIO.It's the only decent ttrransmissions out there.

I am so sick of the garbage coming out of broadcast radio.. XM Satilite was a breath of fresh air!

I get to listen to such a broader spectrum of shows.... NASCAR, and my favote, Old Time Radio... when it was good broadcasting...

I recently drove 7,500 miles through 25 states for three weeks and don't know what I would have done without the XM radio in my car. I especially appreciate the traffic and weather transmissions for the major cities. Big cities are the hardest to get through when you're driving cross country. With Xm, I don't have to try to find local stations. I can chekc the weather a day ahead of time and as I approach the city I can check the traffic. If you every had to cross the MISS. River in St Louise in I44 lately, you'd know what I mean.

Normal stations are so boring,.... same liberal crap... depressing news and tons of commercials which are a total waste of time. On the road, ther is no signal drop... you can listen to a full hour at 80 mph and never get out of range.

I can also select the type of music with out having to seach through the 'bible belt' xmisions in the south or having to weather the So Cal rap stations... gotta love the 50s, 60s and 70s music stations on XM

KEEP YER MITTS off my radio. I chose it. I pay for it. It's my choice.

I fought in a war for my rights and yours. JUST LEAVE ME ALONE and let me have some smalll amout peacefull broadcasting.....

Basically, stay the hell out of my business and let companies like XM do theirs.
